Introduction to Oil and Gas Exploration and Production

LECTURER

Anastasis Kokkinos

Esanda Oil & Gas Training Specialist

Anastasis Kokkinos has 30 years' experience in the oil and gas industry with a focus on full field development and lifecycle costing. His experience covers onshore, offshore, deepwater and subsea, conventional and unconventional developments. He has worked closely with subsurface/reservoir teams and senior management to ensure integrated field development plans. He also has expert knowledge of IHS/CERAs QUE\$TOR field development and costing software, running training programs on behalf of IHS/CERA.

Seminar Overview

The course provides a comprehensive overview of the oil and gas exploration and production industry from an historical, current and future perspective for both non-technical and technical staff. The principles of exploration, development and production will be covered and complemented by what is happening in the industry and what the future holds. The full lifecycle of exploration to product deliver will be covered.

Topics covered

- Petroleum Geology
- History of the Oil and Gas Industry
- Uses for Oil and Gas
- The Big Picture
- Upstream/Midstream/Downstream
- Exploration and Production
- Petroleum Economics

Target Audience

Participation to the seminar is highly recommended for:

- Professionals who need to learn about the industry
- Personnel within the industry
- Technical support staff entering the industry
- Technical staff who want to expand their understanding of the industry
- Students considering the industry as a career
